Supervisor Fitzgerald presented the following resolution and moved its adoption:

RESOLVED, that the Town Board of the Town of Boston strongly objects to and opposes the announced increased water and maintenance charges proposed by the Erie County Water Authority as being excessive, and it is

FURTHER RESOLVED, that the stated reason for said increase to finance future extension of the water system is not authorized by the Public Authorities Law, and it is

FURTHER RESOLVED, that the Erie County Water Authority furnish the specific services provided for the proposed \$39.00 fee for the yearly service of each water hydrant, and it is

FURTHER RESOLVED, that a copy of this resolution be sent to the Erie County Water Authority and other municipalities so affected.

Seconded by Justice Stromecki and when duly put to a vote resulting as follows:

The Town Attorney volunteered to proof-read the updated Ordinance Book and have it ready for the printers at the regular meeting in February.

Reports for Sewer Dist. #1 and #2 were considered satisfactory.

The Enforcement Officer reported that Trailer Court maps would be given to the Town and Fire Departments and that the trailers would be spotted on these maps.

Mr. Sprague was advised by the Town Attorney that even though the Erie County Health Dept. may approve his proposed expansion of his trailer park, it does not necessarily mean that the Town would as it must conform to our Trailer Ordinance.

Highway Supt. Luno reported that the hole on East Lane, as complained about by Girard Seil on December 3, 1969, has been all taken care of and Mr. Seil concurred with this report.

Justice Tills reported that it is the Board's feeling that right now we are just not ready to get into garbage collection on a town wide basis as the cost would exceed what the individual property owners are now paying, and that there is no reason to continue looking into this matter until present conditions might change.

The proposed sub-division regulations will be taken up at a Special Meeting.

A motion was made by Justice Stromecki and seconded by Supervisor Fitzgerald that \$5000.00 be loaned to the Highway Department to cover their payroll for the month of January.

DEER MANAGEMENT UNITS (DMU's)

WHAT IS A DMU?

A geographical unit within which the deer range is relatively uniform and where specific regulations may be employed to manage deer, based on known biological facts.

WHY THE NEED FOR DMU's?

1. Better utilization of the deer herd.
2. Healthier deer and preservation of the range.
3. Highest continuous harvest of antlered deer.
4. More hunting opportunity.
5. Fewer hunter-landowner and deer-landowner conflicts.

Range

New York State is not a uniform deer range. Deer live in river valleys and on mountains. They live on good soil and poor soil, where there is intensive farming and marginal farms, in suburban surroundings and wilderness tracts, and everything in between.

Weather

When the wide variety of New York State weather is considered on top of this, it is easy to see that our deer herd is not living under a uniform set of conditions.

Hunter Access

The most valuable tool in deer management is adequate harvest by hunters. For example, land where hunters have easy access has to be managed differently than a wilder terrain, where few hunters are willing or able to penetrate.

For these reasons, management of the deer herd cannot be uniform statewide, but must take these factors into consideration and compensate in some manner for each.

HOW WERE DMU's DEVELOPED?

The evolution of the present DMU's has taken many years. Deer biologists in the 1940's recognized that differences in the deer range existed but did not have enough information to define them in small units. They did go from a statewide system of management to three major regions: Adirondacks, Catskills, and Central/Western. A short time later, the State was divided into five management sections.

In 1965 more data were available, and the State was divided into 10 deer sections. Data were gathered within these sections to further refine the deer management system.

The Party Permit system has been used every year since 1960 in some portion of the State. Data on does, fawns and bucks taken on party permits have been recorded by Party Permit Area, but bucks taken on a regular buck license are recorded only by town and county and the 10 deer sections. It has been difficult to compare the adult buck take with the adult doe take in any area, because some towns are split by the DMU

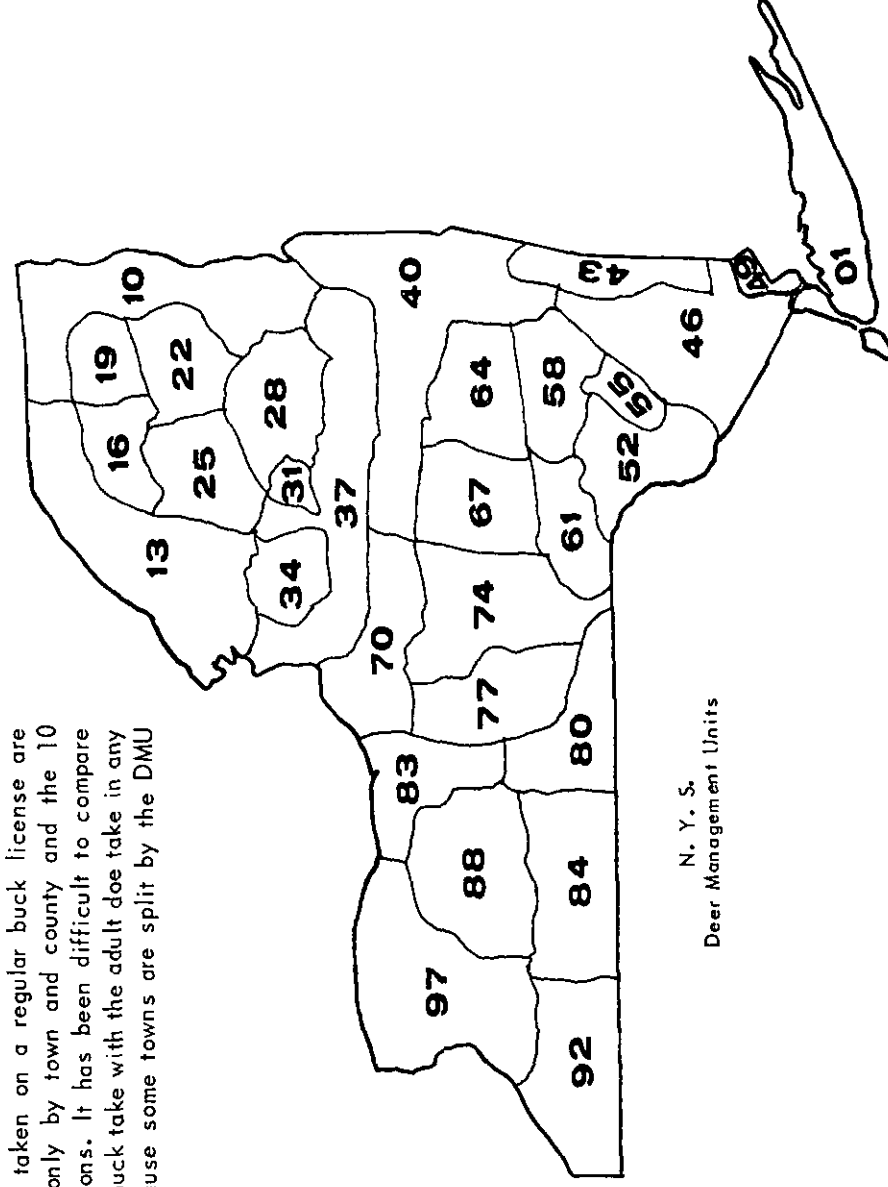

boundary. Now that more refined deer management is required, there is a need to know the DMU in which each buck is taken, in addition to the town and county as requested in the past.

PRESENT

The desirability of managing deer on more distinct ecological units has been recognized for many years. Now with the necessary data available DEER MANAGEMENT UNITS have been designed for use beginning in 1972.

FUTURE

It is expected that there will be minor changes in boundaries. The greatest changes will probably be indision of the larger units into smaller ones.

WHAT CAN YOU, THE HUNTER, DO?

1. A detailed map will be available before the hunting season each year. Secure a copy from your licensing agent or the regional office of Environmental Conservation. Become familiar with the boundaries of DEER MANAGEMENT UNITS in the parts of the State you hunt.

2. When you kill a deer, write the DEER MANAGEMENT UNIT where the kill was made on both the deer carcass tag and on your report tag.

3. Return the report tag to the Department as required.

As a hunter what value is this new DEER MANAGEMENT UNIT system to you?

The information you supply when you report your deer will result in better deer management.

Better deer management means:

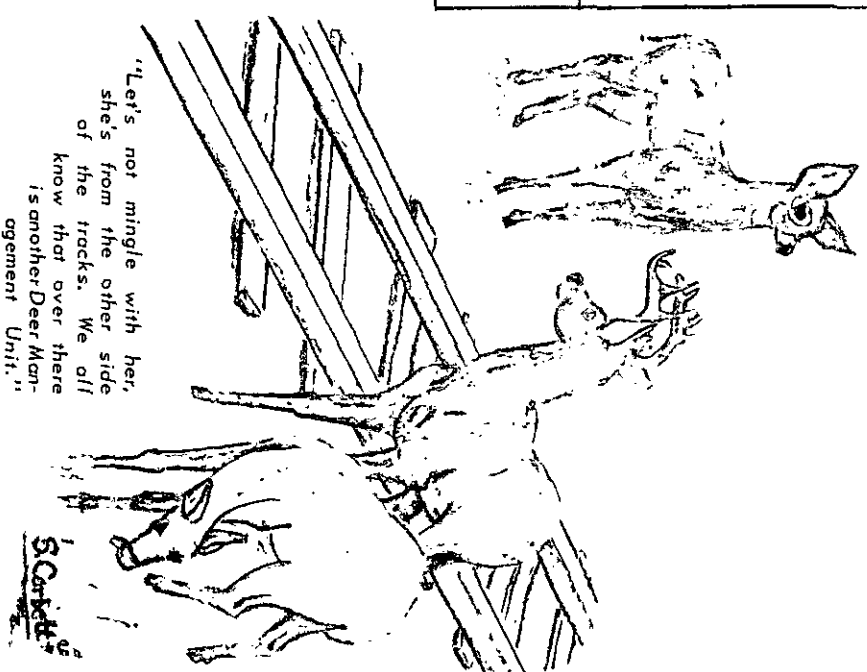

- optimum utilization of the herd including the harvest of antlerless deer.
- healthier deer.
- a stable deer herd which lives within the capacity of the range to support it.
- happier landowners.
- happier hunters.

Research defining Deer Management Units was conducted under Federal Aid in Fish and Wildlife Restoration, Project W-89-R.

A reply from the Housing and Building Codes Bureau stated that as long as the State Building Construction Code is effective in the Town of Boston, the State Code pursuant to section 374 of the Executive Law remains an alternative to such local laws or ordinances and a builder has the choice of building under the provisions of the State Code or under the provisions of local laws or ordinances. If the builder chooses to build under the provisions of the State Code, the local laws or ordinances regarding building construction become inoperative for that particular building and the municipality is not legally authorized to enforce any more restrictive requirements than are provided for in the State Building Construction Code. It was decided to refer this matter to Councilman Quinn in order that he may relay the information to the three Fire Companies.

The Town Attorney was directed to contact the Erie County Water Authority regarding the lowering of the water line at the entrance to the B-Kwik Market on Route 219. Further, he was directed to write to the owners of this Plaza and give them a limit of ten days for the above repair to be made or a barricade will be placed across the driveway. It is to be noted that the Town Engineer, Cullen D. Moncreiff, considers the present condition a hazard to the 12" water main.

The Town Clerk reported a Disposition of Claim in the case of Salvatore Aronica and Rosalie Aronica in the amount of \$1,757.00.

The proposal of Suburban Propane (Suburban Cablevision) for a TV cable franchise was referred to the Town Attorney for investigation and report back to the next regular meeting.

A letter from the New York State Electric & Gas Corp. reported that the street light had been installed on Ludon Drive.

A motion was made by Justice Tills and seconded by Supervisor Fitzgerald that the Town Clerk be directed to write to Mr. Robert Weller and tell him that it is the opinion of the Town Attorney that we cannot proceed under Article 12-A of the Town Law to diminish district lines, leaving then the only alternative action a petition of the residents; that if he intends to present these new districts, as discussed at the Town Board, for acceptance by the Town, we suggest he so proceed; and that we are not in favor of even considering a contractual relationship between the districts until the petition process has been fully exhausted.

(b) BE IT FURTHER RESOLVED that a new Section of the Zoning Ordinance, designated Section 8, of Article V of District Use Regulations entitled "Planned Development District (PD-1)" be added as follows:

Section 8. Planned Development District (PD-1)

a. DECLARATION OF PURPOSE.

The Town Board recognizes the importance to the town of unique multi-building development of mixed uses projects that require unified planning and design. Further, it is recognized that such projects, being controlled by a single real estate entity responsible for their sponsorship, development and subsequent management, and being complicated and involving large areas, are not reasonably and beneficially regulated by the customary zoning provisions for individual lot development.

Therefore, the Town Board has provided the Planned Development District specifically for such unique projects. It is not intended to supplant the customary zoning districts for any other reason, including the achievement of minor variances in particular district uses or dimensional regulations. Nor is it intended to provide for variations in residential building types or any other procedure provided for in the Town Subdivision Regulations.

b. IDENTIFICATION OF PLANNED DEVELOPMENT DISTRICTS.

Planned Development Districts shall be further identified in the applications and, if subsequently approved, on the Zoning Map and in all related documentation by a parenthetical reference to the most similar district regulation (e.g. Planned Development District (PD-1)).

c. MINIMUM DISTRICT AREA.

Planned Development District areas shall be at least five (5) acres for residential projects and ten (10) acres for non-residential projects or for mixed residential and nonresidential projects.

d. PROCEDURE.

(1) All applications for Planned Development Districts shall be processed as an amendment to the Zoning Map, using the standard application form.

(2) In addition to the standard Zoning Map amendment application form, the sponsor of a Planned Development District shall provide the following maps and documentation to the Town Board.

(a) An existing conditions map or maps for an area including all lands within five hundred (500) feet of the proposed district boundaries showing, among other things, the following:

- (1) The boundary lines of the proposed district.
 - (2) All boundaries of zoning districts or municipalities.
 - (3) Indication of the topography and any significant natural features, such as ponds, swamps or wooded areas.
 - (4) All existing rights-of-way or easements, whether public or private.
 - (5) All existing buildings or structures and an indication of their use.
- (b) A district land use and circulation plan, showing, among other things, the following:
- (1) The boundary lines of the proposed district.
 - (2) The land areas to be devoted to each element of the development project, including specifically parking, truck-unloading and service areas, and open-land uses.
 - (3) Any subareas planned for separate stages of development, provided, however, that no such subarea shall be less than five (5) acres.
 - (4) The character, preliminary, alignment, grade and cross-sectional dimensioning of all vehicular roadways and pedestrian walkways.
 - (5) Any special considerations with respect to the relationship of the proposed development to surrounding land uses, existing or future, and to traffic or community facilities.
- (c) A descriptive statement and tabular summary of the following matters:
- (1) The ultimate purpose and general character of the project.
 - (2) Those things that make the project unique and as a result require a Planned Development District.
 - (3) The compatibility of this project with the town's Master Plan and with the purposes of this code.
 - (4) The period of time over which this project is proposed to be developed if any staging of subarea development is indicated.

A letter from I. Morrison, Deputy Commissioner, Division of Traffic & General Safety, Erie County Dept. of Public Safety, was read to the Board. This letter stated that there would be a meeting on the snowmobile problem on November 17th at 10:00 A.M. at the Orchard Park Town Hall with the hope of being able to resolve the legislation and come up with a uniform pattern for the six counties.

Highway Supt. Luno announced that all Highway Supts. were having a meeting on November 12th with a member of Mr. Umecker's staff to discuss the subject of snowmobiles.

Justice Stromecki entered the meeting at this time.

In the audience were a great number of members from both the Western New York Snowmobile Club, the Snow Pacers and many individuals interested in this sport. Town Attorney Maxwell reviewed and explained the State of New York Snowmobile Legislation which he considered ambiguous in many aspects. The general feeling of the audience was that all the roads in the Town of Boston should be open for this purpose, but the Board felt that they could not take any action until after the above mentioned meetings had taken place and they had more information as to what roads the County and State were going to open.

It was decided to have another special meeting on November 18, 1970 at 8:00 P.M. to further discuss this problem and inform the public as to what they learned at the above mentioned meetings.

A motion was made by Justice Tills and seconded by Justice Stromecki that the meeting be adjourned.

An employment referral service will be operated by an employment contact person who will be paid to receive calls from prospective employees and youth 15 years old who wish employment.

A clinic will be set up to advise youth on procedures in obtaining employment and the proper attitudes necessary to sustain same. Clinics will be set up to prepare youth in specific tasks such as: certified babysitting, landscaping, etc.

Youth will be engaged in doing personal contact to promote jobs for the Employment Center.

2. Youth Drop-in Center.

A Drop-in Center will be started to promote a place for youth "being out" in a constructive atmosphere. Various interest groups will be offered for specialized activities such as chess (already started) model airplane club, art groups etc. Both of these emphases will be done to attract youth who do not wish to be involved in highly organized and structure groups within school and or community organizations. Our approach will be to create situations where adult/youth counseling relationships can be present and for youth group work.
