

SAFETY.

is ConnectLife's top priority.

BLOOD DONORS NEEDED

The need for blood donors in WNY continues. ConnectLife, WNY's only organ, eye, tissue, and community blood center is the primary supplier of blood products for Kaleida Health, ECMC, and all the hospitals in Niagara and Wyoming Counties.

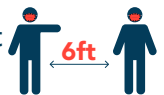

SAFETY OF DONATION

ConnectLife values the health and safety of all donors, staff, volunteers, and partners. Measures are in place and will continue to ensure safety:

- Donors who are not feeling well, are not to enter the donation center or drive location.
- We are checking staff's health at the start of each shift.
- We are taking donor temperatures when donors arrive to donate to ensure the safety of everyone.
- Everyone must wear a mask, including donors and staff. If needed, we will provide one.

- We are adhering to appropriate social distancing during the donation visit:
 - At our donation centers and indoor blood drives, all donor wait chairs, screens, beds and refreshment chairs are 6 feet apart.
 - On our ConnectLife buses, we have donors wait until notified to enter the bus to ensure space is maintained in screening and donor beds.
- We maintain policies requiring that all facilities and equipment undergo frequent cleaning and disinfection as part of an ongoing infection control program. Additionally, we are performing extra cleaning and sanitizing of all beds, equipment, and surfaces after each donor.

PLEASE CONSIDER DONATING

It is imperative that healthy and eligible individuals continue to donate blood so that an adequate blood supply can be maintained for our local hospitals.
